Camryn Rose

Founder, Grotto | Data Science | Project Management | Business Operations | Environmentalism
San Francisco Bay Area

Summary

With a background in software engineering and business operations, I am passionate about environmental sustainability and human health. My expertise bridges the gap between the inception and implementation of big ideas, with a focus on data science and project management. My love for puzzles and uncovering inefficiencies has driven me to build innovative solutions that make a positive impact. I am eager to collaborate with others who share my dedication to creating projects that benefit our planet and its people.

My personal passion is regenerative agriculture as a critical component to solving climate change, drought, and a nutrient-deficient food system. Talk to me about what you're working on in your backyard!

Experience

Grotto

Founder, Managing Director
June 2025 - Present (6 months)
Fairfax, California, United States
