

Dear friends and family!

Anywhere Dx has traction! And now launching our "500-for-\$150" campaign!

It's simple - We're looking for **500 people to invest \$150** to help bring the first at-home Strep test to market.

You know the pain, the stress, time, and cost of getting a child tested just to answer, "Is it strep?" - Now the solution is on the way!

We just need your help!

Be one of the first investors and tell your friends to do well - In turn you'll be among the first to receive early kits of tests as soon as they're ready for market.

Here is the link: <https://seedandcure.com/anywhere500>

Two easy steps:

1. See the video
2. If it resonates, click invest and enter \$150 (or more is you like)

My goal is 500 early investors, and it starts with YOU. And then... please forward this to parents you know.
