

Type at the Speed of Thought.®

charachorder.com Frisco, TX X IG Y T D B2B Technology Notable Angel Hardware Ecommerce

Highlights

Notable Angel

Raised \$25k or more from a notable angel investor

\$1M+ Revenue

Earned over the last 12 months

Repeat Founder

Started a prior company with \$2M+ in funding or revenue

- 1 +1,000% Successfully Funded on KickStarter 3 times.
- 2 +100,000,000 Organic Social Media Views from Consistently Viral Demos
- 3 +13,000 Orders Shipped
- 4 World Class Investors, Groundbreaking Proprietary Technology, & an Enthusiastic Community of Users

Team

Riley Keen CEO SPV Voting Proxy

Former Toyota, CES Top New & Noteworthy, CodeLaunch Finalist, MS Georgia Tech

charachorder.com IG

Matthew Swarts CTO

PhD Georgia Tech Research Institute Branch Head of Machine Learning & Data Analytics

IG

Monica Keen CFO

Former Samsung, MS Computer Science Engineering

IG X

Adan Arriaga CCO

Toyota E-Commerce, Serial Founder & Marketing Guru

Alejandra Salas CPO

Early community supporter that through hands-on contributions, was onboarded to lead assembly, and later promoted to head production, leading CharaChorder through 2 major product launches.

Derek Elliott Creative Director

Industrial designer turned 3D animator with over 20 years of experience taking complex topics and presenting them in a digestible, marketable way.

Raymond Li Director of Open Source

Software Engineer in big-tech AI infrastructure, PyTorch core contributor

IG

Tangent Chang Customer Specialist

Full-stack engineer at aetherAI, developer of several tools for CharaChorder users, and active member of the CharaChorder community

Alan Carratalá Director of Community

Court Interpreter turned Entrepreneur. The customer's voice within the team.

Pitch Deck

Welcome to our 1st Public Equity Offering

For decades, we've grown accustomed to a system that's slow, sequential, and constrained by a layout designed for typewriters.

We don't think that makes sense anymore.

That's why we've built a new standard for the digital age. Everything we do ties back to our mission to get the whole world typing at the speed of thought.®

CharaChorder isn't just a faster, more comfortable keyboard. Type individual keys like an ordinary keyboard, or chord multiple keys together for billions of possible outputs. It's the flexibility of a keyboard, the speed of a steno machine, and the ergonomics of a Datahand all baked together into 1 ultimate peripheral that's affordable & accessible for the masses.

Just like chording unlocks a deeper level of creativity in the world of music, we're doing the same for human computer interaction. The potential is limitless, and the results are mind-blowing.

Our Elevator Pitch! CharaChorder

What we've done so far

- Built & shipped +13,800 products all around the world
- Developed our own firmware and input engine (CharaChorder Engine)
- Proven that users can dramatically exceed traditional typing speeds
- Built a passionate community pushing the limits of human input

Where we're going

Our goal isn't just to sell keyboards. With your help we aim to:

- License CharaChorder engine to OEMs & partners
- Expand into education, gaming, accessibility, and beyond
- Build tools that help people think, create, and communicate more fluidly

We believe we can make CharaChorder a foundational layer of human-computer interaction, one that makes learning feel like a video game where you level up in real life.

Why now

Three things are converging:

1. AI is accelerating creativity. In this new age, the speed you can communicate with machines is the biggest bottleneck to bringing your ideas to life.
2. Creators, Engineers, and E-Athletes are demanding more expressive tools.
3. People are more open than ever to learning new interfaces that give them an edge, and reduce repetitive strain.

The world is ready for something better than QWERTY. Now we're ready to make it available for masses.

Why we're raising

- Scale production & distribution so we can reach customers all around the world.
- Make the onboarding experience so fun it becomes a selling point rather than a barrier to entry.
- Accelerate partnerships, and our ability to license technology like the CharaChorder Engine

This isn't just about speed. It's about removing friction between what you think and what you create. When we succeed, we don't just make typing faster... we fundamentally improve how people connect with one another.

Together, we can get the whole world typing at the speed of thought.®
